

# Digital Readiness for End-of-Life Emergencies

## *A Quick Guide*

### Mobile Phones

# Apple

**Apple** provides multiple ways to manage end-of-life planning via iCloud, Medical ID, and Legacy Contacts:

1. **Medical ID:** Open the **Health app** > **Medical ID** > **Edit** > Add personal details like medical conditions, allergies, and emergency contacts. This information is accessible via the **Lock Screen**.
2. **Legacy Contact:** In **Settings** > **Your Name** > **Password & Security** > **Legacy Contact**, you can assign trusted individuals who will be able to access your data after death.
3. **iCloud Sharing:** To ensure critical files are accessible, upload documents to **iCloud** and enable sharing with trusted family members or contacts.
4. **Find My iPhone:** Ensure your family can access your device in an emergency using **Find My iPhone** to unlock or manage the phone remotely.

# Samsung

**Samsung** has integrated security and sharing features:

1. **Emergency Contacts:** Go to **Contacts > Groups > Emergency Contacts** and add important contacts to ensure their accessibility during emergencies.
2. **Samsung Cloud Backup:** Enable **Samsung Cloud** to back up critical data automatically. You can share important files or grant access to trusted individuals.
3. **Secure Folder:** Use Samsung **Secure Folder** to store sensitive information like passwords or documents, granting access to trusted individuals using **Samsung Pass** or sharing PINs with executors.
4. **Find My Mobile:** Ensure your family can access your device in an emergency using **Find My Mobile** to unlock or manage the phone remotely.

## Samsung Support

# Google

**Google** offers multiple tools for end-of-life planning:

1. **Google Contacts:** Add emergency contacts via **Settings > Safety & Emergency > Emergency Contacts**. These can be accessed without unlocking the phone.
2. **Google Takeout:** Use **Google Takeout** to export your data and provide a copy to loved ones. You can assign trusted people to receive data posthumously.
3. **Inactive Account Manager:** Set up **Google's Inactive Account Manager** to decide who can access your account data if you pass away or become inactive for a set period.

## Google Support

# One Plus

**OnePlus** allows for basic emergency setup and account management:

1. **Emergency Contact Setup:** Access **Settings > Security & Lock Screen > Emergency** Info to add personal details and contacts.
2. **OnePlus Cloud:** Ensure files are backed up via **OnePlus Cloud**, and share necessary access with trusted people.
3. **Remote Unlock:** Using **Find My Device** from Google, you can allow trusted people to unlock or locate your phone remotely in case of an emergency.

## OnePlus Support

# Oppo

**Oppo** provides emergency features as part of its ColorOS system:

1. **Emergency Contacts:** Go to **Settings > Security > Emergency SOS** to add contacts who will be notified during emergencies.
2. **Oppo Cloud Backup:** Use **Oppo Cloud** to back up important documents and information. You can share this with family members for ease of access.
3. **Device Tracking:** Ensure your family has access to your device using **Find My Device** through the Google platform.

## Oppo Support

# Xiaomi

**Xiaomi** MIUI includes tools for data management and emergency preparation:

1. **Emergency Contacts:** Set up **Emergency SOS** in **Settings > Password & Security > Emergency SOS** and input relevant contacts.
2. **Mi Cloud Backup:** Store your important data in **Mi Cloud**, and share access with trusted individuals.
3. **Account Security:** Use **Mi Account** to control data access and remotely manage your phone using **Find My Device**.

## Xiaomi Support

# Motorola Edge 30

**Motorola Edge 30** devices offer emergency settings to help manage crucial end-of-life needs:

1. **Emergency Information Setup:** You can add your medical information (allergies, conditions, blood type) and emergency contacts.
2. **How to activate:** Go to **Settings > Safety & Emergency > Emergency Information**. Here, you can enter medical data and add emergency contacts. This information will be accessible from the lock screen for first responders.
3. **Motorola Care App:** Depending on the region, Motorola phones may offer a support app like Motorola Care, where you can manage extended warranty and care plans, potentially useful in preparing for device-related needs near end of life.

## Motorola Support

# Nothing Phone 2

**Nothing Phone** doesn't have a dedicated "end-of-life planning" feature like some other smartphones. However, you can still manage end-of-life planning on your Nothing Phone 2 by setting up the following features manually:

1. **Emergency Info:** Go to **Settings > Safety & Emergency > Emergency Information**. Add contacts and medical details, accessible from the lock screen.
2. **Google Legacy Contact:** Visit [myaccount.google.com](https://myaccount.google.com) > **Data & Privacy > Manage** your inactive account. Set a timeout and add a trusted contact.
3. **Digital Will:** Use apps to store passwords, documents, and digital assets for loved ones.
4. **Security:** Set up a strong Screen Lock under **Settings > Security**.
5. **Backup:** Enable Google Drive Backup under **Settings > Google > Backup**.
